

Born to Run, but Nowhere to Play

- Suffolk and Nassau counties have more than 50,000 acres of public parkland.
- 49% of Long Island residents own at least 1 dog.
- On-leash dog walking and off-leash areas that allow people and dogs to exercise and socialize promote good health and responsible pet ownership.
- Dog walking in parks and off-leash activities are legitimate recreational activities like running, hiking, biking and horseback riding.
- Yet today less than 1% of LI parkland is designated for off-leash activities and 1,000s of acres of parkland are totally off-limits to dog walkers and their dogs.
- **Join LI-DOG. We need more access to parks now!**
